NEW DELHI 2 INDIA; }
The 3rd September 1951.

S. P. JAIN,
for Registrar General, India,

NATIONAL SAVINGS CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000, and two joint holders upto Rs. 50,000/-.

Full particulars obtainable from Post Offices, District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioners, Simla.

Deposits accepted in multiples of Rs. 100/- upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per annum (free of all taxes and not taken into account in assessing the total taxable income) is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay Calcutta, Delhi & Madras, and Branches of The Imperial Bank of India in other places transacting treasury business.

Full particulars obtainable from District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioner, Simla.

3½%

TEN-YEAR TREASURY SAVINGS DEPOSITS

AC.275

TODAY'S BEST INVESTMENT FOR SMALL SAVERS

† Figures not available.

Explanation of symbols used:—B.—Births; B.R.—Birth Rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D.D.—Dysentery and Diarrhoea; R.D.—Respiratory Diseases; M.D.—Maternal Deaths; D.R.—Death Rate; I.D.—Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 11th August, 1951, relate to 184 towns with an estimated population of 24,666 thousands. The total number of towns is 236 and their population is 29,440 thousands. Thus 78% of the total number of towns representing 84% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 17,452 and 8,435 representing birth and death rates of 36.8 and 17.8 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 165 towns with an estimated population of 21,783 thousands. Information about Assam and Bihar could not be included. The total number of towns is 202 and their population is 25,128 thousands. Thus 82% of the total number of towns representing 87% of the total population is covered. The numbers of births and deaths recorded in these towns were 15,762 and 7,781 representing birth and death rates of 37.6 and 18.6 per thousand of population

respectively. The table at the end gives the position by States.

The towns of Pandharpur in Bombay and Nellore and Tanjore in Madras recorded high death rates of 56.2, 65.2 and 52.7 per thousand of population respectively. In Pandharpur, the high death rate was largely due to deaths from fevers and respiratory diseases, and in Nellore and Tanjore, the high death rates were not due to any one of the specified causes.

(B) States (Part B).—The data here relate to 19 towns with an estimated population of 2,883 thousands. The total number of towns is 34 and their population is 4,312 thousands. Thus 56% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,690 and 654 representing birth and death rates of 30.6 and 11.8 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
